

# Women in (Co)Homology

## 2-3 April at Loughborough University, UK

Join us to celebrate the 100 year anniversary of Emmy Noether's profound observations that gave us homology as we know it today. This conference features women researchers from across areas whose research builds on her foundational ideas.

In addition to the invited speakers, anyone is welcome to attend and submit abstracts for contributed talks regardless of gender.

### Invited Speakers

**Tamar Bar-On** (Oxford/ Bar-Ilan)  
Number Theory

**Karin Erdmann** (University of Oxford)  
Representation Theory

**Clover May** (NTNU / Isaac Newton  
Institute Cambridge)  
Algebraic Topology

**Anthea Monod** (Imperial College London)  
Data Science and Biomathematics

**Brita Nucinkis** (Royal Holloway  
University of London)  
Group Cohomology

**Sarah Whitehouse** (University of  
Sheffield)  
Algebraic Topology

### Registration

Deadline to apply for contributed talks/posters and financial support: **23<sup>rd</sup> February 2025**

Deadline to register for participation: **9<sup>th</sup> March 2025**
