

German Language Courses in Berlin

The Berlin Mathematical School wants to assist students with learning German. Every summer before the semester starts we offer two language courses, one for absolute beginners and one for level A1-A2. This is primarily offered to the new students coming to Berlin.

The BMS offers all students a reimbursement of up to 250 Euros for one German language course taking place in Berlin, if they cannot take advantage of the above mentioned Language Course organized by the BMS.

You may choose any course from any private or public school that takes place in Berlin either before the semester starts or during the semester. This list contains a number of language schools in Berlin. The list is by far not complete, so please feel free to look around. Please note that this document only lists courses in order to help you find your way through the offers quickly – it is not a recommendation for these courses. We do not have any information about their quality.

There are two types of courses:

Intensive courses: You will have lessons every day and get an intensive preparation before the semester starts.

Evening Courses during the semester: The courses are less intensive, but stretch over a longer period.
